Technical Product Manager | AI & Software Engineer | LLMs · MCPs
· Agentic Systems
Greater Chicago Area

Summary

Hello World ! I'm a recent M.S. Computer Science (AI emphasis) graduate with a strong foundation in Software Development and Machine Learning. I enjoy building AI-driven systems and web applications that solve real-world problems

Tech stack: • Python, JavaScript, TypeScript, Java • React, Next.js, Vue.js, Node.js • MongoDB, MySQL • TensorFlow, PyTorch, LangChain, scikit-learn • AWS, Docker

I'm passionate about using technology to serve God, communities and create meaningful solutions. Open to opportunities in Software Engineering, AI/ML, and Full-Stack Development

Let's connect and build something meaningful

Experience

VeSoko.com

AI Engineer

October 2025 - Present (11 months)

Architected a 15+ tool MCP ecosystem and LangGraph agent that drove a 35% conversion lift and reduced token costs and latency by 40%, while owning the full AI product roadmap and sprint planning.

Shipped full-stack checkout features (Next.js, FastAPI, Node.js/Express) with guest transactions, shipping logic, and discount handling — boosting orders by 50%+ and eliminating checkout friction.

Built a production-ready Next.js/React AI chat interface integrated with FastAPI and co-designed in Figma with PM/UX teams, delivering the full UI in 3 weeks.

Marketeq Digital

Technical Product Manager

May 2026 - August 2026 (4 months)

Led epic delivery across Agile sprints by using Claude AI to audit frontend specs, surface Figma documentation gaps, and generate engineering-ready Jira tickets with validated acceptance criteria.

Coordinated cross-functional delivery across engineering, QA, and design teams by managing Jira workflow stages and synthesizing backend architecture docs to align stakeholders.

Accelerated sprint velocity by embedding AI-assisted ticket generation into the team's delivery workflow, reducing spec ambiguity and improving handoff quality between PM and engineering.

Jasco Products

Technology Research Engineer

January 2025 - May 2025 (5 months)

Oklahoma, United States

Evaluated emerging hardware, IoT, and consumer technologies through technical benchmarking, feasibility analysis, and performance testing to inform product development decisions.

Designed testing methodologies and analyzed experimental data to identify technology adoption opportunities and engineering tradeoffs.

Synthesized technical research into actionable recommendations for engineering, product, and business teams, supporting innovation strategy and roadmap planning.

Oklahoma Christian University

IT Technician and Student Advocate

August 2022 - December 2024 (2 years 5 months)

Oklahoma, United States

Resolved 1,000+ support requests from students, faculty, and staff across software, authentication, networking, and system access issues, achieving a 95% same-day resolution rate via Zendesk.

Diagnosed hardware, software, and account management issues, improving user productivity and reducing recurring technical incidents through systematic root cause analysis.

Maintained detailed support documentation and ticket analytics to identify common failure patterns and drive operational workflow improvements

UL Solutions

Quality Assurance Intern

May 2024 - August 2024 (4 months)

Fremont, California, United States

Automated RF compliance testing workflows in Python for SPEAG DASY robotic systems and spectrum analyzers, accelerating certification testing across WiFi, Bluetooth, Thread, LTE, and 5G devices.

Developed data processing and validation pipelines to analyze SAR measurement outputs, improving testing accuracy, reproducibility, and reporting efficiency.

Executed end to end certification testing for four consumer hardware products, ensuring compliance with FCC and ISED regulatory standards.

Built automated quality control checks and calibration verification procedures that maintained 100% certification readiness and reduced manual review effort.

Education

Oklahoma Christian University

Master's degree, Computer Software Engineering · (August 2023 - August 2025)

Oklahoma Christian University

Bachelor's degree , Computer Science with Cybersecurity · (August 2021 - May 2025)
